

IMLCC Chapter 5 Rule Comments

From Commissioner Reed (NV)

Rule on Expedited Licensure-5.10 State of Emergency Rule - Waiver of Timeframes

It is questionable whether this rule can be implemented, based on the different statutes in each state. If one governor imposes a waiver, it doesn't mean other states must follow that waiver. This action would need further discussion by the full commission.

Section (1) Remove the words "*or the Executive Committee*" in the last sentence of Section (1), as the Exec Comm should not have authority to waive enforcement for a full commission who have varying statutes in each state. The full commission needs to vote on such a drastic measure. Waiving time frames may conflict with current state requirements-but I'm not certain. Plus, I don't believe waived rules can override a state Governor's directive.
