Good Afternoon,

Thank you for the opportunity to review and comment on the changes to Chapter 4.

The changes to the definition of employer are not clear. I would recommend changing the definition to read:

“Employer” means a person, business or organization located in a physician’s designated state of principal license that employs or contracts with a physician to practice medicine **and maintains an active office or practice location, with employees, at that location.**”

Sincerely,

Timothy Terranova
Assistant Executive Director
Maine Board of Licensure In Medicine
